

Catalogue: **School and Community Furniture**

Category: **Acoustical Ceiling Clouds**

Code: **20534011**

Description:

This type of soundproofing arises for applications where a standard false ceiling system is required, but very strict functional requirements are required. This panel has a visible grid system, through which each panel can be easily dismantled. The system consists of panels with an approximate weight of 2.5 kg / m². The panels are made of high-density, class 1 fire-retardant glass wool Available sizes 60x60 cm / 120x60 cm / 120x120 cm

Notes:

* the cost must be updated after viewing the room to be soundproofed, to assess any particularities that may require additions to the price provided.
