

Catalogue: **Urban Furniture**
Category: **Benches in recycled plastic**
Code: **PE50000**

Description:

The modular linear bench is a piece with simple geometry that serves as a basic module for creating a variety of seating solutions. It can be used on its own or combined with other elements to form larger configurations.

It forms part of a range of furniture designed for public spaces, characterised by high durability and compositional flexibility. The forms are based on fluid lines and rounded geometric transitions, allowing for the creation of harmonious and versatile compositions in terms of function and scale.

The collection is manufactured using rotational moulding technology with HDPE (high-density polyethylene) granules; this ensures a uniform material structure, high mechanical strength and a long service life even under conditions of intensive use.

It also offers resistance to UV rays, moisture, temperature fluctuations and mechanical damage, making the pieces suitable for both indoor and outdoor use.

- Dimensions: 100 x 47 cm
- Overall height: 42 cm
