Code: **PE30027**

Description:

Our tent halls are set up based on innovative constructions using anodized aluminium*, which guarantees durability, safety, ease of installation and versatility of application.

Articulated folding supports enable easy installation without the necessity to use high cranes. Standard tent halls and marquees are installed in 20 minutes, while storage tents with an area of 1000m2 in one day.

The module-based construction allows to combine tent halls in any configurations, including storeys, and expand the constructions by addition of further segments.

They can be made of PVC, ABS in sheets, 6mm polycarbonate, unbreakable glass, trapezoidal sheet, stratified sheets with thermal insulation.

They can be equipped with a pneumatic opening mechanism, sliding opening systems, doors, windows, pavement and gutters, heating and air cooling systems.
