

Catalogue: **Park & Playground Equipments**

Category: **Metal Swings**

Code: **PE2105X**

Description:

Load-bearing structure in galvanized steel made with 8x8 cm section poles painted with double coat powder, to ensure adequate resistance to atmospheric agents with polyethylene flower-like decorations on the intersections and 12x8 cm rectangular section crosspiece. The accommodation for the wheelchair is made entirely of painted galvanized steel tubing with a foldable non-slip aluminum sheet platform. Oscillating movement on self-lubricating Teflon bushings with Nylon-coated steel cords with polypropylene ends for oscillation. Safety chain placed at the bottom of the swing in order to limit the oscillation. Stainless steel screws with flower-shaped safety screw covers.

Overall dimensions: 320 x 210 cm

Height under beam: 220 cm

Safety area: 7.5 m x 3 m approx.
