**Description:**

Casetta dei sogni is a truly magical and stimulating environment. A small house made by making irregular walls and angles to deform the perception and stimulate the mind. The structure is entirely made of wood impregnated in an autoclave, covered with colored hpl panels and "wood" themed decorations. The particularity of this house is in the roof, on which are placed shaped cuts (stars, flowers, moon ....) and the dangling mirrors, which generate shadows always moving inside. Platform base: approximately 200x230 cm.

**Notes:**

The colors of the equipment shown in the images are to be considered purely indicative.
