

Catalogue: **Park & Playground Equipments**

Category:

Code: **PE02010**

Description:

Lights and colors house.

This article exploits the research of the last decades on the sensorial aspects of the game, to create an environment full of stimuli and interaction with space, sound and light.

Structure made entirely of autoclave impregnated Nordic pine, composed of four differently studied sides.

Multicolored Plexiglas allow you to see a new and imaginative world, but also the sound and touch come stimulated, thanks to materials and forms that interact with the child.

Overall area: 180x180 cm
