

Catalogue: **School and Community Furniture**

Category: **Projector Screen**

Code: **BL21008**

Description:

Tripod screen, entry level model, of Italian manufacture, for quality video projections with an item with an excellent value for money.

The handle integrated in the box, made of iron and lacquered in black epoxy, allows easy and comfortable transport.

It can be rotated on its own structure at 360 °, allowing to configure the viewing point in an optimal way. It can be used in classrooms, demonstration centers, meetings and conventions in small business rooms.

The cloth can be tilted using the proprietary multi-point system, to eliminate the trapezoid effect, also called the keystone effect.

A red fabric tightening knob, placed on one side of the box, allows you to adjust the fabric tension, so as to make the projection surface taut and flat.

The PVC canvas is M1 certified of the high reflectance fireproof type and is used for frontal projections. Equipped with a black back, it is indicated in the presence of light sources behind it (light gain 1.3).

Net projection area:

155 × 155 cm, with a projection diagonal of 88 inches.

180 × 180 cm, with a projection diagonal of 95 inches.

Viewing angle: 150 °.
