### Description:

Floor kit in E.V.A. , density 100 Kg / mc (ethylene copolymer - vinyl acetate), composed of 12 slabs (50x50 cm) in different colors: blue / red / green / blue / yellow / orange; complete with edges and angles.

Thickness 10 mm, surface 3 m<sup>2</sup> (2.00x1.50 m).

The anti-shock flooring is born from the need to reduce accidents and problems related to safety in the interior spaces, in this case we also add special attention to color and practicality.
