

Catalogue: **Park & Playground Equipments**

Category: **Safety Surfacing**

Code: **PE33017**

Description:

Plates made with SBR rubber granules and assembled with polyurethane resins for flooring for animal use.

These floors are non-slip, non-slip, permeable to water and have an extreme life span while retaining elasticity for a long time. This product is available in 2 variants:

- In blocks: it is the ideal cover for animal farm floors, such as walkways, corridors, breeding areas etc.
- Plates: lends itself to cover all the applications of flooring for animal use for rest, such as stables and beds reducing the risk of possible injuries and making the parking area soft, elastic and warm. It is available in waterproof and non-draining version.
