

Catalogue: **Park & Playground Equipments**

Category: **Safety Surfacing**

Code: **PE33036**

Description:

Track for tricycle shock-absorbing rubber modular with jigsaw-like joint. The track consists of 24 curved pieces with interlocking, and 15 straight pieces with interlocking. The material with which the flooring is made, in addition to being safe and resistant, by composition favors the total drainage of liquids making the product particularly suitable for outdoor applications. The overall dimensions of the assembled track are 800x800 cm. thickness 30 mm
